10	0	10	20	30	40	50	60	70	80	90	100

Place finger on top red row and find the first number of your math problem. If your problem is  $8 \times 7$ , you would find the number 8 on the top row. Then, looking at the left hand red row, find your second number. If your problem is  $8 \times 7$ , you would find the number 7 on the left row. Trace your finger down from the 8 and across from the 7 until you come to a common box to find your answer! ( $8 \times 7 = 56$ )

After working with the table, you will soon discover a pattern. All answers appear twice, and will help with teaching “Fact Families” ( $9 \times 3 = 27$  and  $3 \times 9 = 27$ ).

## Other Teaching Opportunities:

- ✓ Number Recognition
- ✓ Skip Counting (2, 4, 6, 8...)
- ✓ Patterns

X	0	1	2	3	4	5	6	7	8	9	10
0	0	0	0	0	0	0	0	0	0	0	0
